

**Description**

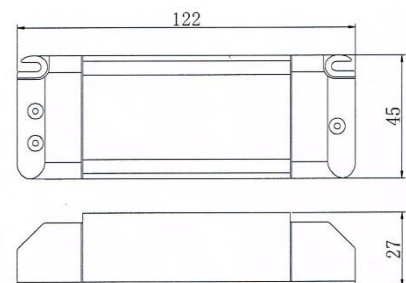

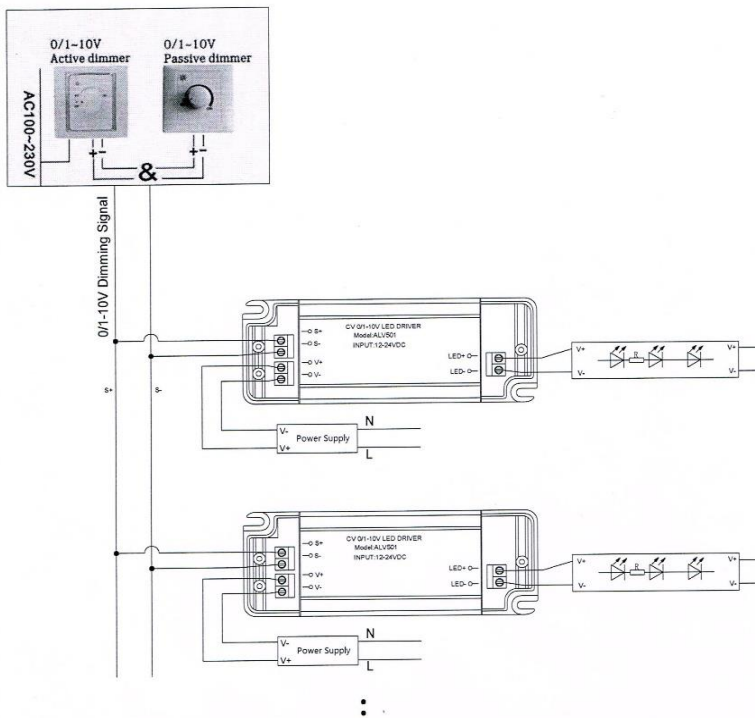

**Low voltage one channel PWM LED dimmer  
controlled by 0/1-10V**

**Technical Specifications**

|                               |                         |
|-------------------------------|-------------------------|
| Input Voltage                 | DC 12-24V               |
| Max. PWM output power         | 120W by 12V 240W at 24V |
| Dim control input             | 0-10VDC/1-10V DC        |
| Max. operating output current | 10A                     |
| Type of protection            | IP20                    |
| Ambient temperature range     | -20 to 40°C             |
| Dimensions LxWxH              | 122x45x27 mm            |
| Product weight                | <b>96g</b>              |
| Number of controlled outputs  | 1                       |
